

## CD Box DS2T

### High-End Audio CD transport

- Three digital outputs (Optical, S/PDIF Co-axial and AES/EBU) aconnection to an external D/A converter is mandatory for audio listening
- Excellent 4-layer suspended CD transport
- „Blue tiger“ servo board for 1:1 CD playback
- Luxurious slot-in mechanism
- DC power supply (<1watt standby power consumption)
- High contrast dot-matrix display
- Trigger in and output
- Massive 3mm aluminium faceplate in silver or black
- Solid cabinet protects against vibration and interference
- Optional wooden side panels available in walnut, eucalyptus and rosenut

### Technical data

|                                      |   |
|--------------------------------------|---|
| Supports:                            | CD, CD-R, CD-RW and Hybrid-SACD                                 |
| Digital output                       | 1x co-axial (S/PDIF)<br>1x optical (S/PDIF)<br>1x XLR (AES/EBU) |
| Outboard power supply                | 18V/10000mA DC; 220 - 240V, 50Hz                                |
| Standby power consumption            | < 1 watt  |
| Power consumption                    | 18V/600mA DC  |
| Dimension W x H x D (D with sockets) | 206 x 72 x 194 (200)mm (alu)<br>240 x 72 x 194 (200)mm (wood)   |
| Weight                               | 2670g without power supply                                      |

### CD Box DS2T - High-End CD Transport!

Pure CD players are in contrast to DVD or Blu-ray Disc players frequently better in playback of stereo CDs. The CD Box DS2T is designed exclusively as a pure audio CD transport, sending digital "Red Book standard" signals to an external digital to analogue converter and is a true master of his trade. In addition to a high-quality sound, a durable drive is essential for the perfect CD playback, that is why we put our CD drives in a torsion-resistant cabinet. Our servo system allows real-time scanning with minimal jitter. We decided to make our newest generation of CD Box a pure transport because ideally the converter electronic and the CD drive are separated from each other to realise the best possible soundsignature. Together with any advanced D/A converter, like our DAC Box DS2 ultra, highend sound reproduction is achieved, as it can not be found elsewhere in this price range.

Damp it feet optionally available

Visually the CD Box DS2T is adapted to the new DS2 line with their elegant looks and versions with wooden side panels, as pictured below. Sidepanels in the options eucalyptus, walnut and rosenut are available, giving the new DS2 line no less than eight different finishes. That guarantees to meet the high requirements in taste of our valuable customers.

Eucalyptus

Walnut

Rosenut
