

Aluminium Upgrade Sub Platter

Available in 3 different versions

MSRP 129 € (incl. VAT)

- Precision machined out of aluminium to the highest tolerances
- Adds more mass and further damps unwanted resonances
- Increases speed accuracy and short term speed stability (Wow & Flutter)

Material aluminium platter/stainless steel spindle

Weight 700 g

Available versions

- **9120097826480** suitable for Debut Line

- **9120097822277** suitable for The Classic

- **9120097828439** suitable for X1 & X2

The Alu Sub Platter takes your turntable to the next level. The diamond cut aluminium sub-platter can be machined to much improved and higher tolerances and will be a substantial upgrade to regular sub-platters. It adds more mass to the entire platter and drive system, resulting in additional damping of noise and unwanted resonances. The improved tolerances during production will increase overall speed accuracy. The additional mass improves short term speed stability, or also called Wow & Flutter.
