

THE CLASSIC EVO PLATTER UPGRADE

Aluminium sub-platter

MSRP 129 € (incl. VAT)

- Suitable for The Classic turntables with standard sub-platter
- Precision machined out of aluminium to the lowest tolerances
- Adds more mass and further damps unwanted resonances
- Increases speed accuracy and short term speed stability (Wow & Flutter)

Material	aluminium platter/stainless steel spindle
Weight	700 g

The Classic Evo sub-platter upgrades all older The Classic turntables to new Classic Evo specifications. The diamond cut aluminium sub-platter can be machined to much improved and lower tolerances and will be a substantial upgrade to regular sub-platters. It adds more mass to the entire platter and drive system, resulting in additional damping of noise and unwanted resonances. The improved tolerances during production will increase overall speed accuracy. The additional mass improves short term speed stability, or also called Wow & Flutter.
