"This is the stuff of true high-end CD players"

- This is the **best balanced silver disc spinner** at the price.
- The result is an **affecting and involving listen**, and it's all down to microdynamics – the **subtle dynamic accenting** of the players and vocalist – which make the **song come alive**.
- ...letting you **listen into the mix** and take out whatever you want.
- It served up an **immersive sound** that made me want to **get deeper** into the mix.
- The more intently I listened, **the more there was to hear**.
- This machine is also **good at soundstaging**.
- Yet the M3scd sounded **strong and controlled, and tuneful** too.
- This machine made the athletic **drum work sound splendid**.
- **It sounds far better than it has a right to be at the price**, with no obvious failings whatsoever.
- This is a **great machine** and the **class-of-the-field at this price point** right now.
