

## Debut Carbon EVO

[Visit the Site](#)

**"The hairs on the back of my neck stood on end. Impressive."**

The phono cable is one of **the nicest I've seen in an entry-level turntable**; it would do justice to a model costing twice as much.

the Evo did a fine job of reproducing all of this, **imaging with precision** and an **easy, engaging sound**.

The Evo **seemed to add or subtract nothing from the sound** - quite a compliment for an entry-level model.

with the Evo I got the sense of just **how large was Columbia's 30th Street Studio...**

Its combination of absolute **ease of setup, rock-steady platter speeds, amazing tonearm, and its overall look** comprise a package that's an **incredible bargain...** Its low price belies the high quality of its engineering and construction. **It's a winner.**
