

Debut Carbon EVO

"Pro-Ject has improved on its Debut Carbon Evo in exactly the right way."

With the Debut Carbon Evo, Pro-Ject reached a new evolutionary stage with its inexpensive turntables. **A hot tip not only for vinyl beginners.**

There was **real life in the music** because the Austrian deck turned out to be a **real energetic bundle.**

For me, the Debut Carbon EVO is one of the **best turntables** in its price range.
