

Debut Carbon EVO

"This little sucker cooks"

This EVO has enough **élan to exorcise any snobbery.**

... found this turntable to be the budget-constrained **perfect-pitchfanatic's dream deck.**

the Debut Carbon EVO is **greater than the sum of its parts.**

... giving you a made-in-Europe turntable/arm/cartridge with **pedigree and performance so far beyond its market category as to embarrass the rest.**

Whoever combined and '**voiced**' the three elements of **turntable, tonearm and cartridge** has displayed **system-assembly genius.**

... the resultant sound was **in-the-room/in-your-face, as-real-as-you-need presence.**
And that's magic.
