

Debut Carbon EVO

[Visit the Site](#)

"The Debut Carbon Evo excited me downright with its drive"

The optically so simple Debut EVO plays like a master: authentic voice-reproduction, rich bass, very robust and dynamic brass section, and grand spaciousness.

I can't remember hearing this disc with a turntable under 1,000 euros (and that includes CD players under 1,000 euros...) better, more energetic, more joyful, and more thrilling.

... the Debut Carbon EVO is a superb offer. There is a large selection of turntables for around 500 euros, but hardly any serious competition for the Debut Carbon EVO.
