

Debut Carbon EVO

[Visit the site](#)

**"Pro-Ject's
Debut Carbon EVO is
designed for audiophiles
from the bottom up"**

- We've tested the sharp-looking table out for ourselves, and the result of this engineering is evident from the first time its needle hits an album.
- it continually delivers excellent sound while avoiding pitfalls.
- ... we can't recommend Pro-Ject's Debut Carbon EVO highly enough.
