"To my ears, this is the one to beat"

- What **impressed me** the most was **the easy setup**. The Debut Carbon EVO took me under ten minutes to set up, and **everything felt dialed-in and ready to go almost immediately**.
- Pro-Ject did a **fantastic job of making the steps as simple and straight-forward** as possible.
- **The presentation was just right** on the Debut Carbon EVO.
- I was **impressed** by the Debut Carbon EVO's ability to **sound natural and dead-center on the beat**.
- The Debut Carbon EVO did **an admirable job of keeping up**, never slipping when the full band came back in.
- **The funk factor was powerful** through the Debut Carbon EVO. The deck did a great job of keeping that **tight, steady beat in tune**.
- **Midrange**, particularly the trombones, **sounded tight, and sparkled**.
- **The soundstage had solid depth to it**.
- The Pro-Ject Debut Carbon EVO **sounded terrific**, and for a while there I was **totally content** with a turntable that **costs a fifth of my main deck**. Pro-Ject makes great-sounding gear at reasonable prices. The Debut Carbon EVO is no exception, and I can easily **recommend it to anyone** looking for an entry-level turntable that'll **perform for years to come**.
