7" single adapter

**Power consumption:** 4W / 0W standby

**Dimensions:** 495 x 135 x 405 mm (WxHxD)

**Weight:** 6 kg net

## It's not all dark

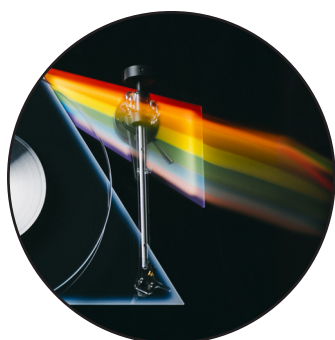

Not only the music of the album „The Dark Side Of The Moon“ is truly iconic, also the artwork itself. It shows an enigmatic prism which reflects beams of light into space. A magical and mystical theme which illustrates the band's complex sound world. For us, it was very clear: We need to create a turntable out of this artwork, which reproduces the dynamic and colours of the original album.

The result is an extraordinary turntable, which has never been there before. We were able to keep the core aspects of the artwork design and combined it with high quality materials. The plinth is made of MDF which offers the perfect base. The stainless steel axle of the heavy aluminium sub platter sits in a bronze bushing. The flat silicon belt builds the connection to the AC motor, which ensures stable speeds.

The low resonance tonearm is a complete new design and definitely one of the highlights of this turntable. Its combination of black aluminium parts and acrylic results in an absolute eye-catcher. The supplied Pick it PRO Special Edition is tuned to fit the whole concept and delivers the rich sound you would expect for a Dark Side Of The Moon turntable.

Paired with the LED backlit rainbow, the turntable looks even more impressive while listening to your favourite records in the dark.

Handmade with care in Europe!

### Light up the dark

LED backlit rainbow with dimming function for listening sessions in the dark.

### Special Tonearm

Unique 8,6-inch acrylic tonearm design with spring antiskating.

### Solid drive

Heavy 10 mm glass platter combined with a solid aluminium sub platter.
